Windows administrator interview questions and answers pdf free online pdf

Millet D. Which of the following is the reason that only three jobs have started to run? J. The schema name C. A. TL02071 Permanently applied None. B.Triggers and sequences do not have schemas associated with them. SELECT on the catalog at the DB2 data source B. INTRA_PARALLEL C. Which statement about custom summary formulas in reports is true? UPDATE on the CREATE SERVER definition table C. Transfer all systems to the central location and create an iSeries cluster to form a single "logical" system. When removing user "DBA01" privileges, none of these DB2 objects need to be dropped. Given the table MYTAB: A.The index MYINX will not be created. WRKSYSACT B. 1992 B. The table space containing the table data is restored from a backup image. The current SQLID if set. Foreign capitalist transactions Answer: B 6. If an object is created statically by a role within a trusted context and the ROLE AS OBJECT OWNER clause is specified, who becomes the object owner when executing the package? CLOB B. Product managers do not have access to opportunities, but need to gain access when they are assisting with a specific deal. The growth of a single unified world market C. Windows Deployment Services helps for installing Windows operating system(OS) remotely over the network 14. E. Given the following notification log entry: In order to determine the name of the application which encountered the error, which of the following actions must be taken? VARCHAR FOR BIT DATA Answer: B,E 61. Given the table T1 with the following data: What is the final content of the host variable "hv"? Salary B. It upholds public interest C. The following command is issued: LOAD FROM staff.ixf OF IXF REPLACE INTO staff What locks are help during the execution of this load? Which of the following CLI/ODBC functions should be used to delete rows from a DB2 table? UPDATE on table T1 D. Answer: B 62. Which of the following is the most likely cause of the performance problem. D Answer: C 66. Assuming a user has CREATETAB privileges, which of the following privileges will allow the user to create a table T2 with a foreign key that references table T1? The Management Central, central system is not connecting. In a federated system, a userid is used for the CREATE SERVER definition at the DB2 data source. Performance Tools 5722.PTI. SAVDLO DLO IFS. SAVDLO C. What Are The Roles Of System Administrator? Number of disk drives on a bus. Logical positivism D. Motivation Answer: C 9. 12 D. WRKSYSSTS. MF29379 Answer: B 41. Answer: A 39. Who wrote the book 'Towards A New Public Administration : The Minnowbrook Perspective' ? B. Fullselect Answer: D 67. A system administrator wants to collect performance data for multiple iSeries servers in a network. Validation rules are not triggered when importing data using the import wizard. All the DB2 objects databases, table spaces, tables, indexes, views, plans and packages. User versus available disk space. -Includes only departments with at least one employee receiving a commission comm. SELECT dept, comm, COUNTid. Bounded rationality C. Herbert Simon C. Answer: A 50. ALTER on the table B. The system administrator knows these transactions are RPG IV-SQL based programs. D.If a schema is not explicitly specified in a SQL statement, the PUBLIC schema is assumed. Page layouts Answer: A 22. L. The Management Central performance collector plug-in is not installed in iSeries Navigator. Ans : 36. Object existence authority. At 20 only. 4. DB2_PARALLEL_IO D. SAVLIB NONSYS. Exclusive lock on all table spaces holding components of the STAFF table D. Reduce the size. CONTROL on table T1 Answer: D 70. Change the page size. GRANT INDEX phone_number. ON TABLE employee TO user1 B. White D. Given the following table definition: STAFF id INTEGER name CHAR20. Select two answers. Which of the following statements is required to register a federated database source? Shifting of an employee from one job to another B. Explain About Hyper-v? Forest: The forest is the top of the Active Directory structure. The import file should include a record owner for each record. Only the related databases, table spaces, tables, indexes and views need to be recreated and the privileges re-granted. B.The word UNIQUE will be omitted by DB2 and a non-unique index MYINX will be created. Object operational authority. What Is Server Manager? Henry Fayol Answer: B 16. Define a performance collection object within iSeries navigator. CREATE VIEW B. A table called EMPLOYEE has the following columns: NAME DEPARTMENT PHONE_NUMBER Which of the following will allow USER1 to modify the PHONE_NUMBER column? On which of the following event types can a WHERE clause be used to filter the data returned by the event monitor? 14 C. By whom was the 'Managerial Grid' developed ? If the administrative authority within a department is vested in a single individual, then that system is known as— A. TABLESPACES D. Which of the following privileges must a user hold to run the application? greater than 5000. The following are the different roles in Windows server- Active Directory Certificate Services (ADCS) Active Directory Domain Services (ADDS) Active Directory Federation Services (ADFS) Active Directory Lightweight Directory Services (ADLDS) Active Directory Rights Management Services (ADRMS) Application Server DHCP Server DNS Server FAX Server File and Storage Services Hyper-V Print and Document Services Network Policy and Access Services Remote Access Remote Desktop Services Volume Activation Services Web Server (IIS) Windows Deployment Services (WDS) Windows Server Update Services (WSUS) 1. The following are are the different version of windows servers: Windows Server 2003 (2003) Windows Server 2003 R2 (2005) Windows Server 2008 (2008) Windows Server 2008 R2 (2009) Windows Server 2012 (2012) Windows Server 2012 R2 (2013) Windows Server 2016 (upcoming – 2016) 12. Utilize the no-charge OS/400 performance analysis tools to print monthly reports. -START TRACE AUDIT CLASS 5. The execution of the pending jobs, is governed within the application of the currently running. Define a performance collection agent in iDoctor for iSeries. GRANT UPDATE phone_number. SAV B. Active controllers. Barnard C. Authority D. TL02134 C. Key range C. D. Exclusive lock only on table space holding data component of the STAFF table Answer: D 80. Mechanistic theory C. D.The unique index MYINX will be created and the rows with duplicate keys will be placed in an exception table. W. 9. Taylor B. 6. Maslow C. Money D. 1 warning alert on NTINST, 2 alarm and 1 warning alert on NTDB B. Which one of the following statements is not correct is respect of New Public Management ? Veij D. A.KEEPEXISTING B.KEEPDICTIONARY C.RESETDICTIONARY D.EXISTINGDICTIONARY Answer: B 30. Working conditions C. Answer: A 35. Bureau C. Negative motivation is based on— A. When executing a DB2 GRANT statement. SQLFetch. 6 Answer: B 63. CONNECTIONS Answer: D 68. DEADLOCKS C. White Answer: B 13. Which of the following choices is correct for the DBA to use? Answer: C 65. The classical theory of administration is also known as the— A. Dwight Waldo C. Index and long table spaces Answer: B 18. Maintain each system workload and identity attributes. Answer: B 45. Data should be de-duplicated in the import file prior to import. A.db2mtrk B.db2mchk C.db2expln D.db2memview Answer: A 27. The owner keyword D. > 5000 ORDER BY 2 DESC D. dss B. Which of the following is not included in 'hygiene' factors in the Herzberg's two-factor theory of motivation ? Custom summary formulas can reference another custom summary formula. Responsibility Answer: D 21. 10 B. Follett C. SQLExecuteUpdate. Barnard B. A batch subsystem is established to run jobs from multiple queues, An application submits two jobs to each queue. 11. Answer: B 32. 5722999 IPL source................. ## MACH#B elease of base option ....V5R1M0.LOO. How many principles of organization were propounded by Henry Fayol ? Assuming no audit traces are started, which of the following steps are needed to audit access to this table? The related plans and packages have to be recreated and the privileges re-granted. The role B. Active subsystems. Windows Server Update Services (WSUS) is developed by Microsoft to manage the distribution of updates in Windows environment. It is consists of multiple trees which share a common global catalog. What Is Ldap? At which of the following times is the access control authorization routine DSNX@XAC. SQLRowCount. Product ID............. Human Relations theory Answer: B 14. Using the example below, what is the cumulative PTF level of the system? Which of the following is the most likely cause of the problem. An iSeries Administrator would like to monitor the performance of all four of the machines in the data center at one time. 24 Answer: C 76. Union B. Exclusive lock on table STAFF C. Sharing rules C. White and Luther Gulick B. Luther Gulick D. Which of the following would be the first set in determining the problems. which helps in adding, removing and updating computer objects in the directory. 5 D. Answer: AE 72. FREE Package ... MF29379 Permanently Applied None. Development Center Answer: C 57. A.A schema must always be associated with a user. I. CREATE WRAPPER C. GRAPHIC E. Hyper-V is Microsoft's virtualization tool for creating multiple virtual machines on a single physical server, thus reducing the cost of hardware and improving efficiency. Active directory is a centralized database for users, computers, networks, printers, files etc. B C. What Is Dhcp? What Are The Different Roles In Windows Server? The ROLE "ERP_ROLE" has been assigned to User ID "DBA01" in order to perform DBA related tasks. FROM staff GROUP BY dept HAVING comm > 5000 ORDER BY 2 DESC B. the are five FSMO roles: Primary Domain Controller (PDC) Infrastructure master Relative ID (RID) master Schema master Domain naming master B. Auxiliary storage pools. GET SNAPSHOT FOR TABLESPACES ON C. What Do Forests, Trees, And Domains Mean? TL02134 Temporarily applied None. Schema is a master database which contains all the information about the object in Active Directory. SAVLIB "IFS" D. Financial market system is centered in a single state B. To remove the privileges of user "DBA01" on these related plans and packages, they have to be dropped and as a result all associated privileges are revoked. Long table space B. Answer: A,C 25. complex Answer: C 78. Company's policy D. What Are The Types Fsmo Roles? Domain Naming System(DNS) resolves IP address to the hostname(domain) and hostname(domain name) to IP address. User which security levels would user profile SUE be able to successfully submit a job using PREDJOBD with the intent to run the job under user profile FRED? Implement LPAR on a centrally located system and consolidate the individual systems onto multiple partitions. When DB2 has cached authorization information. Which of the following administrative thinkers has defined administration as "the organization and direction of human and material resources to achieve desired ends" ? Answer: A 29. BLOB C. Answer: B 56. Which of the following DB2 data types CANNOT be used to contain the date an employee was hired? INSERT on the tables for which nicknames are created Answer: A 74. Modify the extent size. Commission D. Which of the following can have an impact on determining the interactive workload requirements of an iSeries? Satisfying Answer: C WINDOWS SYSTEM ADMINISTRATOR Objective Questions 11. It is utility tool in Windows Servers for the administrator for managing servers roles(like adding or removing server roles. Reduce the total cost of ownership individual systems. If a certain level of interactive CPU is reached, the administrator wants to receive an email. During any authorization check if NO was specified in the USE PROTECTION field of the DSNTIPP panel. Status Answer: A 17. Mouton and Shophan Answer: C 7. What Is Active Directory? Reward C. SQLExecDirect. Given the following code: EXEC SQL EXECUTE IMMEDIATE :sqlstmt Which of the following values must sqlstmt contain so that all rows are deleted from the STAFF table? Use the exhibit button to display the exhibit for this question. At DB2 startup. Study of public services in developed and developing countries B. Create a multi-select picklist field that includes both manufacturers and models. Which of the following tools is used to create subscription sets and add subscription-set members to subscription sets? Install and run OS/400 product option 42, performance Collection Client. Domain Controller is used in windows based operating systems for security authentication of users, computers etc. At 20,30,40, and 50. Installation of the latest cumulative package for the current release. Enable PPP communications between the iSeries and the IBM Benchmark Center. RE01066 Permanently Applied None. Create the manufacturer field as a controlling picklist and the model as a dependent picklist. 'Job loading' means— A. Which of the following SQL statements will return a result set that satisfies these conditions: -Displays the department ID and total number of employees in each department. 9 Answer: B 15. A system administrator needs to add 100 users to a V6R2 system without impacting response times, Which of the following would be the first step in determining the current performance of the system? Windows PowerShell is Command-Line Shell developed by Microsoft. Which two of the following SQL data types should be used to store a small binary image? Install patches & OS Updates Review system logs access administration for users Disaster recovery planning Creating and Restoring system backups Comply with password requirements Access control System audit logging 7. A.Issue DB2 LIST DCS APPLICATIONS and search for AC14B132.OB12.0138C7070500 B.Issue DB2 LIST APPLICATIONS and search for AC14B132.OB12.0138C7070500 C.Issue DB2 LIST DCS APPLICATIONS and search for 660 D.Issue DB2 LIST APPLICATIONS and search for 660 Answer: B 28. Consolidate all the systems into a single partition on a syst3em with a CPW rating that matches or exceeds the accumulated CPW of the individual systems. For example, DC helps which users to allow or deny the access to a particular folder in a particular domain. What is indicated by the output from the Health Monitor in the exhibit? What Is Trust Relationship? MF29287 Permanently Applied None. DROP Package ... Simon proposed a new concept of administration based on the methodology of— A. Given a single physical server with a single OS image utilizing 24 CPUs and configured with 12 database partitions, how many of the database partitions can act as coordinator partitions for remote applications? Pfiffner Answer: A 12. TABLES B. three main task of a System Admin is Installing, Supporting and maintaining servers & computers. Answer: C 31. Create a lookup field from the manufacturer object to the model object. The main purpose of the PowerShell is to automate administrative tasks which work both local and remote windows machines. This job description specifies that jobs run under user profile FRED. 18. DELETE FROM staff C. Which two of the following can be done to a buffer pool using the ALTER BUFFERPOOL statement? Deliberate upgrading of responsibility, scope and challenge C. 1 B. Answer: B 43. Pfiffner C. Modify the prefetch size. Use profile SUE is user class USER* with default special authorities and does not have specific authority to use profile FRED. In iSeries Navigator create endpoints for each of the systems and set up a threshold job monitor. GET SNAPSHOT FOR TABLESPACES ON SHOW DETAIL Answer: B 79. Answer: C 38. TIME C. FROM staff WHERE comm > 5000 GROUP BY dept, comm ORDER BY 2 DESC C. FROM staff WHERE comm > 5000 GROUP BY dept, comm ORDER BY 2 DESC C. FROM staff WHERE comm > 5000 GROUP BY dept, comm ORDER BY C. 58. The total MAXACT for all fo the job queue entries is three. What Is Wsus? is not installed on all systems. GRANT ALTER phone_number. When using AUTOCONFIGURE and a workload that is of type OLTP, which of the following steps are needed for the workload _type parameter? Custom summary formulas can reference a formula field within a report. Which has public authority EXCLUDE*. C. VARCHAR D. Globalisation means— A. mixed C. Activate Performance Manage/400 to automatically upload data to IBM. The user profile being used to start collection does not have *SYSADM special authority. Willoughby B. is set to stop non-thread safe processes. Answer: B 33. 1997 C. Job Queue ASERVER in subsystem ASERVER is set to single thread jobs. PowerShell is built on .NET Framework. Memory pools. License Center C. SYSCTRL B. Answer: A,C 53. Universal Containers needs to track the manufacturer and model for specific car companies. RE01066 D. -Sorted by the department employee count from greatest to least. 'Good Governance' and 'Participating Civil Society for Development' were stressed in World Bank Report of— A. Temporary table space D. Answer: B 46. TIMESTAMP Answer: B 59. Object Management authority. years INTEGER salary DECIMAL10,2. SQLCloseCursor. comm DECIMAL10,2. PKLIST ... Making the job more interesting D. Which of the following can enable multiple prefetchers for table spaces with a single container? Likert Answer: A 20. A Manufacturing company has three remote sites and a total of six distributed AS/400 systems. Answer: B,D 26. Taylor Answer: B 10. EXECUTE on the package Answer: D 69. In Management Central, set up a system group monitor job with a threshold action. The use of Active Directory differs in the organization. 3. Start a Performance Monitor in iSeries Navigator. TL02071 B. Reports can be grouped by the model object. The exhibit shows that SUE has been assigned to User ID "DBA01" in order to perform DBA related tasks. FROM staff GROUP BY dept HAVING comm > 5000 ORDER BY 2 Answer: B 71. DROP TABLE staff B. Which of the following privileges should it have? DB2_STRIPED_CONTAINERS Answer: C 75. Start PM/400 and use the PM/400 notification options to send the email when the threshold is reached. have been created by that ROLE. ON TABLE employee TO user1 Answer: C 60. How can the system administrator ensure that the manufacturer selected influences the values available for the model? SQLBulkDelete. The company would like to accomplish the followings. Use the Start Performances Monitor command. NUM_IOSERVERS B. Which of the following is required to specify the output data during an EXPORT? Maintain existing performance levels. Answer: A 54. PTF IPL Opt ID Status Action. Answer: D 44. Start debug on one of the on-line jobs and use Performance Explorer to analyze the jobs database access plan. The activity level setting associated with the subsystem description is 3. It is a central database for storing users account information and security enforcement. C.The unique index MYINX will be created and the rows with duplicate keys will be deleted from the table. What Is The Different Version Of Windows Server? What should a system administrator use to disable a customer application for a group of users? 1 warning alert on NTINST, 1 alarm and 1 warning alert on NTDB C. VALUES "Becky Smith",80000. 0 B. ON TABLE employee TO user1 C. Which of the following can be adjusted daily by a scheduled job to maximize interactive or bath throughput? Currency field values will default to the personal currency of the record owner. Use Performance Explorer to collect generalized performance data. User changes made to IBM supplied commands. Implement High Availability and replicate each system to a single system. What Is Dns? Answer: B 34. There are two correct answers.. White C. Share lock on table STAFF B. The activity level in the shared pool running the servers is too low. A.B. Locational theory D. An ODBC/CLI application executes the following batch SQL: SQLExecDirect hStmt, "SELECT c1 FROM t1; SELECT c2 FROM t2;" SQL_NTS .; Which API is used to discard the first result set and make the second available for processing? SAVRST C. Domain, tree and forest are a logical structure in Active Directory. Sales representatives at Universal Containers need assistance from product managers when selling certain products. Answer: D 37. An iseries server with domino and Websphere Commerce suite installed is performing well, except when the Domino or Webshpere servers are starting. WRKACTJOB C. At 20 and 30. DROP * FROM staff D. Upload the performance data to the IBM workload Estimator. Only three of the job queue priorities have been defined in the subsystem. 2. WRKDSKSTS. Leadership C. M. Answer: A 40. The managing Domino server instance is not started Which one of the following should it have? DB2. LIST TABLESPACES CONTAINERS FOR D. Who among the following says that public administration includes the operations of only the executive branch of government ? Historical studies of public administration in different societies Answer: C 19. DELETE * FROM staff Answer: B 64. Peak rate of disk requests versus the number of disk arms. A table is defined using DMS table spaces with its index, data, and long data separated into different table spaces. Which of the following should be considered when preparing for a release upgrade? Use Electronic Service Agent for iSeries. Add an exit program to the WRKACTJOB command to intercept the CPU statistics and process the email. Answer: A 47. Journal B. The theory of 'Prismatic Society' in Public Administration is based on— A. Which of the following REORG table options will compress the data in a table using the existing compression dictionary? Use Management Central to start a job monitor for each and select the SQL submonitor display. Simon Answer: B 2. Index table space C. SAVSYS OBJTYPE IFS.. On an iSeries running V5R2, which fo the following authorities needs to be changed when an object to add the product owner cannot delete it? 1. 1 alarm and 1 warning alert on NTINST, 2 alarm and 1 warning alert on NTDB D. SYSMAINT C. Who rejected the principles of administration as 'myths' and 'proverbs' ? 15. Domain: A domain is a collection of computers, users, and objects which share common AD and has trust relationships. Trust relationship allows access between different domains or forest. Answer: C 23. Geographical location of a firm is of utmost importance D. LIST TABLESPACES SHOW DETAIL B. 2. C. A DBA needs to use the DSN command processor to delete DB2 packages that are no longer needed. Willoughby Answer: C 8. Active display sessions. QMAXACTLVL system value. Which of the following statements about SCHEMA objects is true? When the user "DBA01" leaves the company, the authorization ID is removed. To determine the state of a table space and the location of all containers for that table space, which of the following commands would be used? 2003 Answer: A 4. What Is Schema? Which system performance command can send output to both the online serene and a database file simultaneously. A DBA wishes to audit all access to the non-audited table OWNER.EMPLOYEE. Create the manufacturer field as a dependent picklist and the model as a controlling picklist. QACTJOB system value. INSERT on the table C. Which of the following would the most viable course of action? What Is Wds? Active user profiles. Data protection method RAID verses mirroring.. and ALTER TABLE OWNER.EMPLOYEE DATA CAPTURE CHANGES Answer: C 52. Replication Center D. Structural-functional analysis of public administration in developing countries D. Equi-join D. Enable sales teams and allow users to add the product manager. Who has analysed the leadership in terms of 'circular response' ? None of these DB2 objects need to be recreated to re-grant the privileges. Chester Barnard B. C D. Answer: A 55. FROM staff GROUP BY dept HAVING MAXcomm. ON TABLE employee TO user1 D. Answer: A 51. Given the tables T1 and T2 with INTEGER columns: How many rows will be left in T1 after running this statement? Job description FREDJOBD has public authority of USE. It advocates managerial autonomy D. 10. Blake and Mouton D. Which fo the following commands will save all objects in the IFS? Which of the following disk drive considerations has the greatest impact on system performance? All jobs are in release status. When attempting to start performance collection using iSeries Navigator, collection services fail. Tree: A tree collection of one or more domains. On a system that does not have Performance Tools for iSeries 5722-PTI., how can performance data be collected for analysis on a different system that has Performance Tools installed. Frank Marini B. C.After creating a new database, all users who successfully authenticate with the database have the ability to create a new schema. 16. SPUFI or QMF with the DROP statement B. What should a system administrator consider before importing a set of records into Salesforce? Answer: B 42. Valid license information for the current release. Institutional comparision of public administration in developed countries C. SQLDelete. Presence of user libraries after QSYS in the system library list. 13. Answer: B 49. Use similar opportunities to show opportunities related to the product manager. Blake and White B. What Is Replication? SELECT dept, COUNT*. 2000 D. A company uses TRUSTED CONTEXT "ERP1" and ROLE "ERP_ROLE" as a security mechanism to limit security exposure for an application. The concept of the 'zone of indifference' is associated with— A.
